Citymaster 1250plus

Our classic sweeper with “plus” advantage

Functional, economical and efficient

As versatile as its tasks

*Proven technology meets increasing demands.
Efficient and economical.*

Cleanliness is the Citymaster's profession

The Citymaster 1250plus enables both fast and low-noise working and is very comfortable to operate. Extended sweeping functions in combination with the powerful scrub deck provide the perfect solution for every application. Ease-of-use combined with improved comfort for the driver enables fatigue-free, fully concentrated working even over long operating periods. The robust and maintenance-friendly design ensures low operating and service costs in the long term.

Multi-functionality as a standard

The Citymaster 1250plus offers the full range of multi-functionality as a standard – without compromise. Configure your machine to meet your individual requirements and only pay for what you really need.

Class-B
driving license

Excellent sweeping results

The Citymaster 1250plus simply offers more in the 1-m³ class. Whether equipped with small brooms for passage ways with a small clearance width, or with large brooms providing maximum performance – the brooms in combination with the sweeper's powerful suction fan can easily cope with large amounts of dirt. For more flexibility in sweeping, the two features individual-broom-control and brush-head-adjustment are now optionally available for the right-hand broom. The dirt hopper is easy to clean and can be filled to capacity for long operating times, which saves both time and money.

In combination with the CityCleaner, the Citymaster 1250plus has been certified – both independently and by DEKRA – for its eligibility to clean traffic areas after accidents involving oil spills.

Efficient dust control: The sweeper works with a combination of fresh-water supply and water re-circulation system to provide lowest possible emissions of fine particulates (PM10-certified).

Citymaster 1250plus

A winner in every respect: Increased comfort for the driver due to the operating panel ergonomically integrated in the armrest, improved driving comfort and less noise, both in- and outside the cabin. The new sweeping unit offers additional adjustment options for even more superior cleaning results, as well as variable working widths and an extended range of sweeping brooms.

Cleanliness at its best!

When sweeping is not enough

The CityCleaner with its scrub brushes is the perfect solution when intensive cleaning of traffic areas is required. The machine provides superior, completely dust-free wet cleaning and removes practically any kind of dirt the sweeper alone cannot. And it goes particularly easy on the joints in comparison to high-pressure water cleaning.

Sweeping technology in detail

Select the right broom size to meet your individual requirements – also available as noise-reduced “silent brooms”. For particularly low-noise sweeping.

Individual-broom-control

Now optionally available: independent broom control system for more flexibility.

Brush-head-adjustment

Optional hydraulic brush-head adjustment allows adapting the machine to different sweeping tasks.

Increased comfort

Comfortable standard feature: The machine's control panel is integrated in the armrest. The optimal combination of new, smoothly rolling tyres and an air-sprung driver's seat provides superior comfort for the driver, both during operation and transport. The re-tuned sound insulation package ensures pleasantly low-noise working and reduces the environmental impact.

Dumping

A wide opening dirt hopper lid as well as the design with smooth inner services and high-dump make both the disposal of waste and cleaning the hopper fast, easy and safe.

Optional accessories

Hydrant connections, filling hose and on-board high-pressure cleaner

Hand-held suction hose

Always ready for use and perfect for all tasks around the sweeper.

Everything within view on 360°

Don't miss a thing: Optional camera systems provide an additional 360°-angle of vision while the driver can keep his eyes on the work area. For more safety on the road and to reduce the risk of collision damage.

Professional in sweeping – and for multi-functional applications

Green area maintenance

In case your sweeper's capacity is not fully utilised during the summer, the Citymaster 1250plus can be used very effectively as a lawn mower – suction combi machine, providing particularly low-noise and efficient working. Powerful flail mowers are available for maintaining less intensively used green areas.

Winter service

The Citymaster 1250plus offers a full range of equipment to carry out winter service tasks efficiently. From fighting black ice through gritting or brine spraying to snow clearing with the sweeper in combination with a snow blade and snow blower – your additional benefit for the winter season to ensure economically efficient machine operation.
